

REALMS SCHOOL OF DISCOVERY

AUGUST 2026 STUDENT HANDBOOK

Formation. Competence. Character. Service.

Motto

Bringing the Will of the Father into the Earth Realm

Version 1.0 | July 2026 | Effective for the August 2026 Cohort and approved catch-up period

Document Control

Item	Controlled Position
Document title	REALMS School of Discovery - August 2026 Student Handbook
Programme	REALMS School of Discovery
Cohort	August 2026
Document owner	Founder and Office of the President/Director, REALMS Institute
Academic coordination	Oluwatobi Adekunle
Version	1.0
Effective period	August 2026 cohort and approved catch-up period
Governing academic source	REALMS School of Discovery August 2026 Curriculum and Course Outlines v1.1
Institutional source	REALMS Institute Institutional Operating System v1.0
Student status	Controlled student-facing handbook

Authority of this handbook

This handbook summarises the rules and expectations that apply to students in the August 2026 School of Discovery cohort. Where a cohort-specific published curriculum, assessment brief, formal decision or official REALMS notice gives more specific current instructions, that specific controlled instruction applies. Applicable law and formally approved institutional policy prevail over any outdated wording.

Contents

1. Welcome to REALMS Institute
2. What the School of Discovery Is
3. Programme Structure and Learning Routes
4. Weekly Timetable and Learning Modes
5. Courses and Facilitators
6. Student Technology and Equipment Requirements
7. Attendance, Participation and Recorded Learning
8. Absence, Make-Up and Academic Standing
9. Assignments, Quizzes, Practicals and AI Use
10. Unified Assessment and Graduation Requirements
11. Student Conduct, Relationships and Platform Use
12. Welfare, Mentoring, Accessibility and Emergencies
13. Complaints, Appeals, Withdrawal and Deferment
14. Fees, Scholarships and Payment
15. Privacy, Student Records, Media and Communication
16. Certificates, Verification and Alumni Transition
17. Key Contacts and Student Acknowledgement

1. Welcome to REALMS Institute

Welcome to the REALMS School of Discovery. This programme is designed to help you grow as a Christian who is grounded in Scripture, formed in character, disciplined in spiritual life and practically equipped to serve God faithfully in your field of assignment.

REALMS Institute is a standalone Christian educational and formation institution. It maintains a strategic ministry-service relationship with Gloryrealm Christian Centre (GRCC), but REALMS retains its own institutional identity, curriculum, student records and academic standards.

What we are building

REALMS is not simply trying to help students finish classes. The goal is to form faithful, competent and useful Christians who can articulate the Gospel, live under Scripture, steward responsibility, work with integrity, serve others and continue learning.

Our Vision

To raise and equip Christians who reveal the glory, will and wisdom of God in ministry, missions, technology, enterprise, leadership, education, media, governance and society.

Our Mission

To combine biblical formation, prayer, character development, disciplined learning, practical skills, mentorship, service and mission so students become faithful and competent witnesses of Christ.

Our Core Student Expectations

- Christ first - pursue truth, obedience, humility and usefulness to God.
- Integrity - be honest in learning, payments, identity, assignments and communication.
- Kingdom purpose - use formation and skill for faithful service, not merely status.
- Purity and honour - maintain safe, respectful and disciplined relationships.
- Excellence with rest - work diligently without carelessness, burnout or unhealthy perfectionism.
- Stewardship - manage time, money, technology, opportunities and relationships responsibly.
- Service and compassion - combine clear standards with care for people.
- Learning and truth - receive correction, verify claims and keep improving.

2. What the School of Discovery Is

The School of Discovery is an integrated Christian formation and practical skill programme. Every student completes one approved discipleship route and one approved skill pathway. These two parts are not separate optional experiences; together they form one School of Discovery programme result.

Programme Element	Requirement
Discipleship Route A	Foundational Discipleship Programme - for new students and applicants who do not meet Advanced entry requirements.
Discipleship Route B	Advanced Discipleship Programme - all five Advanced courses, for eligible REALMS alumni or applicants approved after foundational knowledge screening.
Skill Pathway	Web Development OR Cybersecurity Foundations. Every student completes one selected pathway.

Programme Element	Requirement
Integrated Requirement	Attendance, participation, integrity, time stewardship and skill capstone requirements are compulsory.

Important

Completing only discipleship or only the skill pathway is not enough for graduation. Every published graduation gate must be satisfied.

3. Programme Structure and Learning Routes

Foundational Discipleship Route

The Foundational route runs across eight weeks and establishes the Gospel, salvation and new creation, spiritual formation, purpose, leadership, stewardship, missions and final integration.

Code	Course	Facilitator
RSD-DIS 101	Soteriology I: The Gospel and the Work of Christ	Pastor Arome Iduh
RSD-DIS 102	Soteriology II: Salvation and the New Creation	Pastor Arome Iduh
RSD-DIS 103	Spiritual Formation and Christian Disciplines	Minister Otache Imanche
RSD-DIS 104	Purpose and Calling	Pastor Onyeka
RSD-DIS 105	Kingdom Leadership and Character	Minister Daniel
RSD-DIS 106	Kingdom Finance and Stewardship	Minister Daniel
RSD-DIS 107	Missions and Evangelism	Oluwatobi Adekunle
RSD-DIS 108	Integration, Assessment and Commissioning	REALMS Faculty Team

Advanced Discipleship Route

The Advanced route requires completion of all five Advanced courses. The programme is led principally by Pastor Arome Iduh, with approved guest teachers where scheduled. Minister Daniel teaches Biblical Principles of Counselling, and Oluwatobi Adekunle teaches Christian Philosophy and Critical Thinking.

Code	Course	Facilitator
RSD-ADV 201	Marriage, Relationships and Family Life	Pastor Arome Iduh / approved guest teacher as scheduled
RSD-ADV 202	Marketplace Ministry and Kingdom Influence	Pastor Arome Iduh / approved guest teacher as scheduled
RSD-ADV 203	Ministry, Priesthood and Church Service	Pastor Arome Iduh / approved guest teacher as scheduled
RSD-ADV 204	Biblical Principles of Counselling	Minister Daniel
RSD-ADV 205	Christian Philosophy and Critical Thinking	Oluwatobi Adekunle

Skill Pathways

- Web Development - beginner-to-foundational competence in HTML, CSS, responsive design, JavaScript, DOM/forms, Git/GitHub, deployment, professional workflow, time stewardship and an integrated capstone.
- Cybersecurity Foundations - ethical and practical foundations in systems, command line, networking, threats, hardening, approved-lab assessment, incident response, reporting, time stewardship and an integrated capstone.

4. Weekly Timetable and Learning Modes

Day	Time	Activity	Mode
Monday	3:30 PM - 6:00 PM	Web Development	Physical/online as approved
Monday	7:00 PM - 9:00 PM	Advanced Discipleship	Online
Tuesday	3:30 PM - 6:00 PM	Web Development	Physical/online as approved
Tuesday	7:00 PM - 9:00 PM	Advanced Discipleship	Online
Wednesday	3:30 PM - 6:00 PM	Cybersecurity Foundations	Physical/online as approved
Wednesday	7:00 PM - 9:00 PM	Advanced Discipleship	Online
Friday	3:30 PM - 6:00 PM	Cybersecurity Foundations	Physical/online as approved
Friday	6:30 PM - 8:30 PM	Foundational Discipleship: prayer and teaching	Online
Saturday	6:30 PM - 8:30 PM	Foundational Discipleship: prayer, teaching and application	Online
Sunday	8:00 PM - 9:30 PM	Foundational Discipleship: one-hour prayer + 30-minute Q&A/reflection	Online

Learning Modes

- Physical Live (PL) - approved students attend their skill pathway onsite. Discipleship remains online.
- Online Live (OL) - approved online skill students attend the live skill class remotely.
- Recorded Primary (RP) - an approved skill delivery route for students with a recognised structural constraint such as timezone. It is not a casual week-by-week substitute for live attendance.
- Discipleship Live (DL) - the normal discipleship route for both physical and online students.
- Discipleship Recorded Exception / Make-Up - used only where approved for a recurring constraint or a particular missed session.

The student portal and official cohort notices will publish the exact session calendar, live links, assignment deadlines, changes and make-up arrangements.

5. Courses and Facilitators

Web Development

Code	Course
RSD-WEB 101	Digital Foundations and How the Web Works
RSD-WEB 102	HTML and the Semantic Web
RSD-WEB 103	CSS, Box Model and Layout

Code	Course
RSD-WEB 104	Responsive Design and UI/UX Foundations
RSD-WEB 105	JavaScript Fundamentals
RSD-WEB 106	DOM, Events, Forms and Validation
RSD-WEB 107	Git, GitHub, Deployment and Client Workflow
RSD-WEB 108	Time Management, Focus and Kingdom Stewardship for Developers
RSD-WEB 190	Integrated Web Development Capstone

Facilitator: Oluwatobi Adekunle.

Cybersecurity Foundations

Code	Course
RSD-CYB 101	Cybersecurity, Ethics and Laboratory Setup
RSD-CYB 102	Computer Systems and Command-Line Foundations
RSD-CYB 103	Networking Fundamentals
RSD-CYB 104	Threats, Vulnerabilities, Risk and Controls
RSD-CYB 105	System Hardening and Network Security
RSD-CYB 106	Approved-Lab Reconnaissance and Vulnerability Assessment
RSD-CYB 107	Incident Response and Security Reporting
RSD-CYB 108	Time Management, Focus and Professional Discipline
RSD-CYB 190	Integrated Cybersecurity Capstone

Facilitator: Oluwatobi Adekunle.

6. Student Technology and Equipment Requirements

A phone is not an adequate primary device for the skill pathways.

Students are expected to have reliable access to a laptop or desktop computer suitable for their approved pathway.

Web Development Students

- Laptop or desktop computer.
- Reliable internet access and a modern browser.
- Visual Studio Code or another approved code editor.
- Git and a personal GitHub account.
- Adequate storage and a backup routine for project files.

Cybersecurity Students

- Laptop or desktop computer; 8 GB RAM is recommended where virtualisation is required.
- Reliable internet access and adequate storage.
- Approved virtualisation software and laboratory images where the device supports them.
- Approved Linux/cybersecurity laboratory environment.
- Practical work must remain within systems specifically provided or explicitly authorised by REALMS Institute.

Cybersecurity ethics rule

No student may scan, test, attack, exploit or otherwise assess a system, account, network or application without explicit authorisation. REALMS practical work is restricted to approved laboratory environments and published scopes.

7. Attendance, Participation and Recorded Learning

Attendance is required for every mandatory live session, practical, assessment and other compulsory activity. Attendance and learning completion are separate records: a student can have an excused absence while still owing make-up learning.

Core Attendance Standard

- The School of Discovery allows no more than three missed required live sessions without approved exceptional treatment.
- Exceeding the published limit triggers a formal review. It does not produce an automatic withdrawal without fair consideration.
- Attendance must be truthful. Students must not mark themselves present or ask another person to impersonate them.
- Repeated lateness, early departure, weak engagement or unverified identity may affect attendance/participation credit.

Physical Skill Attendance

Physical skill sessions use facilitator- or administrator-controlled attendance, including roll-call verification. A student's final status may be Present, Late, Partial, Absent, Excused Absence or another approved status based on actual participation.

Live Online Attendance

Live online attendance may consider connection duration, engagement checks, participation and identity verification. Simply joining a meeting link is not by itself proof of meaningful participation.

Recorded-Primary Learning

Where Recorded Primary is formally approved, the portal will show the exact completion requirements. The default model normally includes verified watch progress, checkpoints, a post-class quiz and practical/reflection evidence. Watching a recording alone is not sufficient.

- The current default watch threshold is normally at least 85% of the available recording.
- Where a linked quiz is required, the normal default pass mark is 70% with up to two attempts unless the session policy states otherwise.
- Recorded-primary work is normally time-bound; the portal displays the applicable deadline and any approved exception.

Recordings for Revision and Make-Up

Recordings may serve as revision, approved primary delivery or make-up learning. A recording never automatically rewrites the original live-attendance record. For example, an approved absence may remain 'Excused Absence' even after the student completes the make-up.

8. Absence, Make-Up and Academic Standing

Official absence channel

Where possible, report an absence through the student portal before the affected session. A WhatsApp message to a friend, classmate or random facilitator is not an official absence request.

Absence Workflow

1. Submit the affected session, reason and explanation through the official portal route.
2. Provide supporting evidence only where reasonably required.
3. REALMS may approve, decline or request more information.
4. An approved absence protects the attendance decision where appropriate, but make-up work may still be compulsory.
5. An unapproved absence remains an attendance penalty even if learning is later recovered.

Typical Escalation

Pattern	Typical Response
First unexplained absence	Reminder and opportunity to correct/report the absence.
Second absence or emerging pattern	Welfare/mentor check and catch-up agreement where needed.
Third absence	Formal warning and eligibility review.
Beyond the published limit	Case review using academic and welfare evidence; possible exceptional approval, deferment or withdrawal.
Serious connectivity/health/family circumstance	Individual evidence-sensitive plan or alternative participation where approved.

The purpose of warnings and recovery plans is to restore disciplined participation where possible. Persistent non-completion, repeated unapproved absence or unresolved requirements may lead to participation review, probation, deferment or withdrawal after fair review.

9. Assignments, Quizzes, Practicals and Responsible AI

Every assessment will state its instructions, deadline, weighting, evidence requirements, integrity rules and any permitted resubmission or resit conditions. Practical pathways assess real application, not only multiple-choice knowledge.

Submission Expectations

- Submit through the approved LMS/portal route unless the assessment brief explicitly states another method.
- Late work may affect the timeliness/recovery component and may require approval before it can be accepted.
- Extensions, resits and alternative assessments are not automatic favours; they require an approved basis and documented decision.
- Students remain responsible for checking that a submission was successfully received.

Academic Integrity

- Plagiarism, impersonation, collusion, purchased work, falsified evidence, assessment leakage and unauthorised assistance are misconduct.
- Submitting another person's code, report, reflection, screenshot, lab output or project as your own is prohibited.
- Students must use their own identity and account. Sharing credentials or asking another person to complete attendance/assessment activity is prohibited.

Responsible AI Use

Each assessment will state whether AI tools are prohibited, permitted for defined support or required for a specified task. Where AI is permitted, students remain responsible for understanding, accuracy, originality and any required disclosure or citation.

AI does not replace learning

Using AI to brainstorm, debug, practise or receive feedback may be permitted in some activities. Using AI to impersonate your own understanding, fabricate evidence, generate work you cannot explain or bypass a prohibited assessment rule is dishonest.

10. Unified Assessment and Graduation Requirements

The August 2026 School of Discovery uses one integrated result out of 100. The student's approved discipleship route, selected skill pathway, attendance, participation and integrity all contribute to the final result.

Assessment Domain	Weight	What It Measures
Approved discipleship route	40%	Understanding, reflection, application, route-specific assignments, practical/application evidence and final integration.
Selected skill pathway	45%	Weekly practical work, assignments, documentation, time management and integrated capstone.
Attendance, participation and integrity	15%	Verified engagement, timely participation, responsible conduct, honest work and responsiveness.

Discipleship Component - 40%

Evidence	Weight
Weekly quizzes and lesson reflections	10%
Route-specific application assignments and case studies	8%
Route-specific practical, project, ministry or application evidence	7%
Personal-growth, stewardship or integration project	5%
Final discipleship-route assessment and integration	10%

Skill Component - 45%

Evidence	Weight
Weekly practical exercises	15%
Assignments and mini-projects	10%
Technical documentation, reporting, GitHub/deployment or equivalent evidence	5%
Time Management, Focus and Kingdom Stewardship assignment	5%
Integrated pathway capstone and defence	10%

Attendance, Participation and Integrity - 15%

Evidence	Weight
Verified attendance or approved recorded-module completion	7%
Participation in discussions, polls, practicals, reflections and class activities	3%
Timely submission, responsiveness and recovery from missed work	2%
Integrity, respectful conduct, honest identity use and original work	3%

Graduation Gates

- Minimum overall programme result: 60 out of 100.
- Minimum approved discipleship-route result: 20 out of 40.
- Minimum skill-pathway result: 23 out of 45.
- Minimum attendance, participation and integrity result: 8 out of 15.
- Submission and defence of the approved skill capstone.
- Completion of the final discipleship-route assessment and all required route-specific projects/integration work.
- Compliance with the published attendance threshold and any approved catch-up requirements.
- No unresolved serious conduct or academic-integrity case.

Non-compensation rule

A high skill score cannot compensate for failure in the student's approved discipleship route, and a high discipleship score cannot compensate for failure to demonstrate practical skill. Every graduation gate must be met.

11. Student Conduct, Relationships and Platform Use

REALMS expects a safe, honourable and disciplined learning community. Christian standards are applied with humility and due process, not public shaming, forced confession or spiritual intimidation.

Required Conduct

- Treat staff, facilitators, volunteers and fellow students with dignity.
- Participate honestly and respectfully.
- Protect confidential information shared in appropriate learning/support settings.
- Follow lawful safety, laboratory and platform instructions.
- Use REALMS systems, Zoom meetings, recordings, groups and resources responsibly.

Prohibited Conduct

- Harassment, sexual misconduct, threats, bullying, hate speech or retaliation.
- Fraud, impersonation, academic dishonesty or falsification of evidence.
- Deliberate disruption of learning or misuse of institutional platforms.
- Unauthorised recording, redistribution or commercial reuse of REALMS classes/resources.
- Cyber abuse, testing unauthorised systems, property damage or deliberate safety violations.

Relationships and Boundaries

Relationships involving an authority imbalance require strong boundaries. Students should not be pressured through spiritual authority, counselling or institutional position into money, relationships, secrecy, political loyalty or personal service. Concerns about boundaries may be reported through the formal complaint/welfare route.

12. Welfare, Mentoring, Accessibility and Emergencies

REALMS aims to combine firm standards with compassionate support. Student-support and mentoring structures may help with participation, prayer, habits, recovery plans, referrals and growth.

- Mentors/support volunteers do not control students' private decisions or demand unnecessary disclosure.
- Sensitive welfare information is recorded minimally and shared only with people who need it for legitimate support or safety.
- Students who need professional medical, mental-health, legal or specialist support may be referred appropriately. Pastoral care does not replace qualified professional care.
- Students needing reasonable accessibility or learning support should communicate this through the approved private channel as early as possible.
- Repeated inactivity may trigger compassionate contact, a recovery plan and clear accountability.

Emergency situations

For an immediate threat to life, safety or health, seek the appropriate emergency or professional help first. Notify REALMS through the official support channel as soon as reasonably possible where the situation affects your participation.

13. Complaints, Appeals, Withdrawal and Deferment

Complaints

Students may raise concerns about admissions, payments, teaching, welfare, conduct, discrimination, data, technology, facilities or staff behaviour. Minor service issues may be resolved informally, but serious matters should enter the formal process immediately.

- Use the student portal complaint/support route where available, or email the official REALMS contact address.
- The person complained about should not control the case where an independent reviewer can reasonably be assigned.
- Retaliation against a person who raises a genuine concern is prohibited.
- Where law-enforcement, safeguarding or emergency reporting duties apply, those duties may override normal confidentiality expectations.

Discipline and Appeals

Where serious misconduct or academic-integrity concerns arise, the student must be informed of the substance of the concern, the process, possible outcome and opportunity to respond. Possible outcomes may include advice, warning, learning remedy, probation, restitution, suspension, withdrawal/dismissal, or certificate action where justified.

Appeals may be considered where there is a procedural error, new material evidence, a disproportionate outcome or an unreasonable decision. Mere disagreement with a properly reached decision is not by itself an appeal ground.

Withdrawal and Deferment

Voluntary withdrawal, administrative withdrawal, deferment, suspension and dismissal are different statuses and are recorded separately. Students who need to stop or pause the programme should use the official process rather than simply disappearing from classes.

14. Fees, Scholarships and Payment

Category	Registration Fee
Physical (Nigeria)	₦10,000
Online (Nigeria)	₦15,000
International Online	\$20 equivalent (gateway may process the published NGN checkout amount)

The August 2026 School of Discovery cohort is tuition-free after the approved registration/processing fee. This does not remove the student's responsibility for personal equipment, internet/data, transport or other personal participation costs unless REALMS explicitly provides them.

Refund Position

The registration/processing fee is generally non-refundable, subject to applicable law and approved exceptions such as duplicate payment correction, institution cancellation, unauthorised charge or another formally approved exception.

Payment and Admission

Payment is not admission.

A successful payment does not override entry requirements, guarantee admission or guarantee graduation. Admission is confirmed only through the official REALMS decision/enrolment process.

Scholarships

Scholarship support is limited and separately reviewed. Submitting a scholarship request does not guarantee approval, admission or a place in the cohort. Scholarship decisions must follow the approved process and available support.

15. Privacy, Student Records, Media and Communication

Student Records

REALMS maintains an official student record covering identity, admission, enrolment, attendance, assessments, results, conduct outcomes, awards and key communications. The LMS, WhatsApp and individual facilitator files may support operations, but they are not the sole official record.

- Each student receives one persistent student identity/student ID within REALMS.
- Students should report errors in their name, contact details or official record promptly through the approved correction route.
- Access to sensitive information is role-based and limited to legitimate institutional purposes.
- Academic records and award records may be retained long-term where appropriate.

Privacy and Data Sharing

- REALMS collects only information reasonably required for admissions, learning, support, records, safety and institutional operations.
- Sensitive information such as health, counselling, disciplinary or financial data receives stronger access controls.

- Student data is not shared with GRCC or another partner merely because of relationship; a legitimate purpose and appropriate data arrangement are required.
- Do not send passwords, identity documents or payment credentials into uncontrolled WhatsApp chats.

Recording, Images and Testimonies

- Students will be informed when sessions are recorded and how recordings are used/accessed.
- Sensitive counselling, disciplinary, personal-disclosure or prayer content may be paused, edited or withheld from retention.
- Students must not independently record or redistribute classes without permission.
- Use of a student's image or testimony for marketing requires specific consent. Refusal does not affect academic treatment.

Official Communication

Official material messages - including offers, fees, timetable changes, results, discipline, privacy and emergencies - should come through approved REALMS channels and be capable of being archived. WhatsApp may support community, reminders and speed, but it is not the sole record for critical decisions.

16. Certificates, Verification and Alumni Transition

A student who successfully completes the School of Discovery and satisfies every published graduation requirement becomes eligible for the REALMS institutional certificate of completion/competence.

Certificate status

The REALMS award is an institutional certificate. It must not be represented as a degree, national diploma, government accreditation or professional licence.

Verification and Corrections

- Certificates/awards use a unique institutional identifier and verification record.
- Names and programme details are reconciled before final issuance.
- A genuine correction does not silently overwrite history; corrected awards are issued through a controlled correction process.
- Certificate withholding, supersession or revocation may occur only through an authorised, documented process where justified.

Alumni Transition

After confirmed graduation, the student's institutional identity and academic history are preserved and the account may transition to alumni access. Alumni may retain access to programme history, published results, their institutional award and the permanent class-summary learning archive. Full recordings may have separate retention/access periods and are not guaranteed permanently.

17. Key Contacts and Student Acknowledgement

Purpose	Contact / Channel
Official website	https://realms.grccglobal.org/
Registration	https://realms.grccglobal.org/register
General / admissions / support email	gloryrealm2025@gmail.com

Purpose	Contact / Channel
WhatsApp Channel	https://whatsapp.com/channel/0029VbC6zkX9mrGkzCTXTS0s
Physical skill-pathway location	No. 3 Shina Olaogun Street, Agbado, Ogun State
Absence requests	Student Portal -> Report Absence (official route)
Academic / LMS notices	Student Portal and official REALMS communication channels

Keep your contact details current

Students are responsible for checking the portal and official communication channels regularly. Failure to read an informal message does not cancel published academic requirements, but REALMS remains responsible for communicating material conditions through approved channels.

Student Acknowledgement

I acknowledge that I have received or been given access to the REALMS School of Discovery August 2026 Student Handbook. I understand that I am responsible for following the published programme, attendance, assessment, conduct, integrity, technology and communication requirements that apply to my approved route and pathway.

Student legal name	
Student ID	
Approved discipleship route	
Skill pathway	
Date / signature (where paper acknowledgement is used)	

Electronic acknowledgement in the REALMS student portal may replace a paper signature. This handbook is a student-facing summary and does not remove the authority of current controlled institutional policies, cohort-specific academic documents, formal decisions or applicable law.
